Aphrodite

Wellness & beauty steam cabin with
digital thermostatic control

Aphrodite

Wellness & beauty steam cabin with digital thermostatic control

Digital thermostatic shower is definitely epoch-making on shower products evolution. No matter when you turn on the shower, it always delivers water with the exactly right temperature only. Enjoy the immediate comfort of shower. Unparalleled shower and hydro-massage sensations come with a few preset shower modes including Scottish shower and 3D circulative opposite hydro-massage.

But this is more than a sensational shower. Vitamin Shower and large LED ceiling shower with chromatherapy make the cabin an uncompromising wellness and beauty centre at home.

With clean, most minimalist and transparent design, Aphrodite series of wellness steam shower cabins look more like an elegant simple shower cabin. Comparing to the complicated and close look of traditional steam cabin, that's the new look of wellness steam shower cabins, perfectly combining most minimalist design and luxurious health & beauty improvement functions.

Let's embrace the new era of digi-shower and bathroom wellness through the affordable luxury.

MAIN FEATURES

- Digital thermostatic shower
- Double-faced control system
- Vitamin E & C shower
- Scottish shower
- 3D circulative opposite hydro-massage
- Pulsating hydro-massage
- Large LED ceiling shower with chromatherapy
- Chemical-free micro-nano bubble skin care system
- **SUPER-HYGIENIC™** disinfection system for tub
- FM radio
- Easy service access
- Double-pole cutoff for power supply, excellently safe

The new era of shower digital thermostatic shower

Digital thermostatic shower definitely makes a new era of shower. Now we don't need to suffer ourselves to test whether the water temperature is right or not. It's always the right temperature, never too hot or too cold. Keep completely relaxed while exposing yourself to a comfortable and sensational shower.

THE NEW EVOLUTION OF SHOWER

Shower evolution	How it functions	Features	Working conditions	Stability
Shower with normal faucet	Users have to adjust water temperature manually.	It highly depends on water supply. Usually users have to feel the water by hand when it's turned on. Users often suffer from uncomfortable too high or too low water temperature because of the hot/cold water pressure change in water supply.	Any with the water pressure below 1MPa	Stable
Shower with mechanical thermostatic faucet	Users can set the temperature and the faucet adjusts itself to the right temperature. If cold water volume is too low to get the right temperature, the faucet stops the water to prevent users from scald	It regulates the water temperature in certain range and it efficiently prevents users from scald. But it doesn't regulate cold water efficiently. Usually users have to feel the water by hand when it's turned on. In case there is not enough hot water supply for a moment, users will suffer from uncomfortable cold water.	Usually it requires: Hot water temperature range 50~80°C; Cold/hot water pressure ratio max. 8:1	Stable but it's relatively easy to be jammed because of its structure, especially in area where water quality is not so good.
Digital thermostatic shower	Users can set the temperature and the system adjusts itself to get the right temperature. If cold water volume is too low to get the right temperature, the faucet stops the water to prevent users from scald. If there is not enough hot water for a moment, the system turns off cold water supply and diverts cold water in hot water supply into drain	In any case it provides the right temperature no matter how the hot/cold water supply pressure is. It diverts water into drain in case it's too hot or too cold compared to the preset water temperature. It's water-saving because it cuts off cold water supply until there is enough hot water. Different preset shower modes are available, including Scottish shower, all-around circulative opposite hydro-massage and Pulsating hydro-massage.	Any with the water pressure below 1MPa	Stable. No matter what quality the source water is, users always enjoy the immediate comfort of thermostatic shower.

The comforts and sensations from digital thermostatic shower

Double-faced control system

Double-faced control system shows how much care Grandehome takes for a supremely comfortable and luxurious shower. Now from the outside control panel, user can adjust the preset water temperature, preset the color of chromatherapy light and tune the FM radio to its favorite. Now everything is ready. In the most relaxed mood, user starts to enjoy the immediate comfort of a sensational shower. After using, user may shut down the system from outside.

The control system makes use of double-pole cutoff for power supply, which brings more safety for users.

Most user-friendly & charming design with most luxurious health and beauty improvement functions. That's the beauty of Aphrodite series of wellness shower cabins.

Inside control

Outside control

Vitamin shower

Vitamin dispenser integrated in the system allows users to enjoy the superb beauty improvement benefits of Vitamin E and Vitamin C while taking daily shower.

Vitamin E

- Antioxidation
- Anti-aging
- Treatment of skin disease
- Increase absorbtion of VE from skin

Vitamin C

- Removing Chlorine from city water
- Increase absorbtion of VC from skin

Vitamin shower

In terms of skin health and skin care, the benefits of Vitamin E are numerous. In fact, skin care products that contain Vitamin E have become an essential part of healthy skin care. Because of its antioxidant activity, vitamin E is vital in protecting skin cells from ultra violet light, pollution, drugs, and other elements that produce cell damaging free radicals. Meantime, Vitamin E plays an important role in the anti-aging of skin. It helps skin look younger by reducing the appearance of fine lines and wrinkles. Also, free radicals are believed to play an important role in skin aging therefore the antioxidant activity of Vitamin E is quite valuable for this skin problem. Vitamin E can also aid in the treatment of various skin diseases or skin conditions, such as psoriasis.

Ingredients with anti-oxidation and Vitamins are widely used in various skin-care products. However, you may realize that there is something in the tap water which has oxidation effects. That's chlorine and chloramine. They are commonly used in disinfection of city water supply. A small portion of chlorine still remains when they reach our skin. The powerful oxidation effects Chlorine has speed up aging of our skin thus it also bring harm to us as far as skin beauty is concerned. Now Grandehome has come up with a solution, the Vitamin C dispenser, which has effective de-chlorine and de-chloramine effects and increase our Vitamin C through skin absorption at the same time.

Vitamin C utilizes ascorbic acid for de-chlorination. It does not hold chlorine but neutralizes chlorine from an element into a harmless compound. As the safest and least toxic of de-chlorination media, it fully neutralizes chlorine and chloramines, and provides additional nutrients for skin and hair. Vitamin C works best with the hot water while other filtration materials do not.

Grandehome's Vitamin dispenser is easy to be maintained. The Vitamin dispenser can be used permanently and only Vitamin E & C needs to be refilled when they are out. 100% pharmaceutical grade Vitamin E & C are recommended to be filled into the Vitamin dispenser. Natural Vitamin E is recommended.

* Vitamin E tablets purchased from shop usually has gel coat, which should be punctured before it's put into Vitamin dispenser.

Different sensational shower modes for beauty and health improvement

Aphrodite series of wellness steam shower cabins act as home spa centre by providing several hydro therapies which are only available at top commercial spa centers.

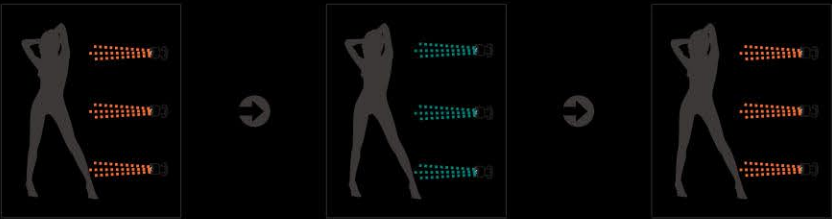

Scottish shower

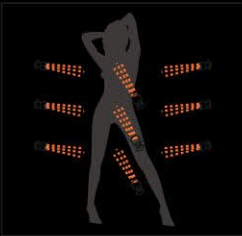

Scottish shower consists of the alternation of warm and cold water streams. It has been one of the most commonly used techniques in the western balneology practice for ages.

Scottish shower stimulates the opening and closing of skin pores and increases skin elasticity. Hot water relieves muscle tension and activates blood circulation, while cold water induces contraction of the tissues. In this way, the capillaries get a good exercise. The skin circulation improves and it becomes more supple and toned.

Meantime, the alternative expansion and contraction of skin capillaries provides a superb superficial micro-massage, which results in stress reduction and removal of the dead skin cells. Scottish shower also helps the restoration of energy and lifts up the spirits.

3D circulative opposite hydro-massage

This most sensational hydro-massage function is only available in few spa centers or beauty salons. Now users have the possibility to enjoy it at home as part of their daily life.

By this function, users enjoy full body hydro-massage in circulation both from front and back. There are always 6 jets from different directions to target both the front and back side of the user. The circulation and alternation of full body massage brings unparalleled sensation and relaxation to users.

*Note: this function is only available with version S8B and S8C. With S8A, circulative hydro-massage is equipped.

3D circulative opposite hydro-massage

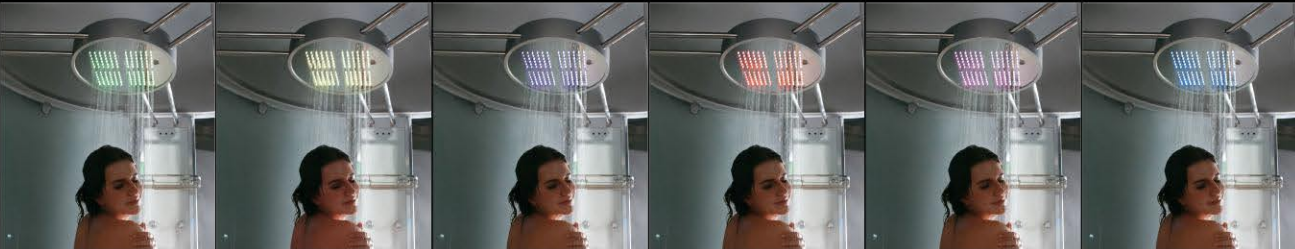

Pulsating hydro-massage

By this function, users enjoy pulsating full body massage. The pulsating hydro-massage imitates the finger touch of a massagist, who gives an interval pressure to the body to stimulate the blood circulation. Comparing to a massage by massagist, the pulsating hydro-massage delivers a full body massage at the same time, extremely stimulative and relaxing.

Large led ceiling shower with chromatherapy

Just imagine the appealing shower from the large LED lighting ceiling shower. Water comes out calmly from the lighting nozzles. When water hits the body, users feel as if they are touched by water and chromatherapy light at the same time. That's a perfect combination of chromatherapy and hydrotherapy.

ATHENA

Built-in wellness & beauty steam cabin with digital thermostatic control

ATHENA series of steam cabins have innovative built-in style. A natural shower environment is created through wooden roof, seat and floor, by most precious wood – teak. The silver metal frame of the cabin and black glass panel make good contrast with wooden parts, extremely fashionable and luxurious. What's more, the cabin has surprising beauty and wellness improvement functions. No wonder it's a perfect choice for high-end bathrooms.

Elegant built-in style

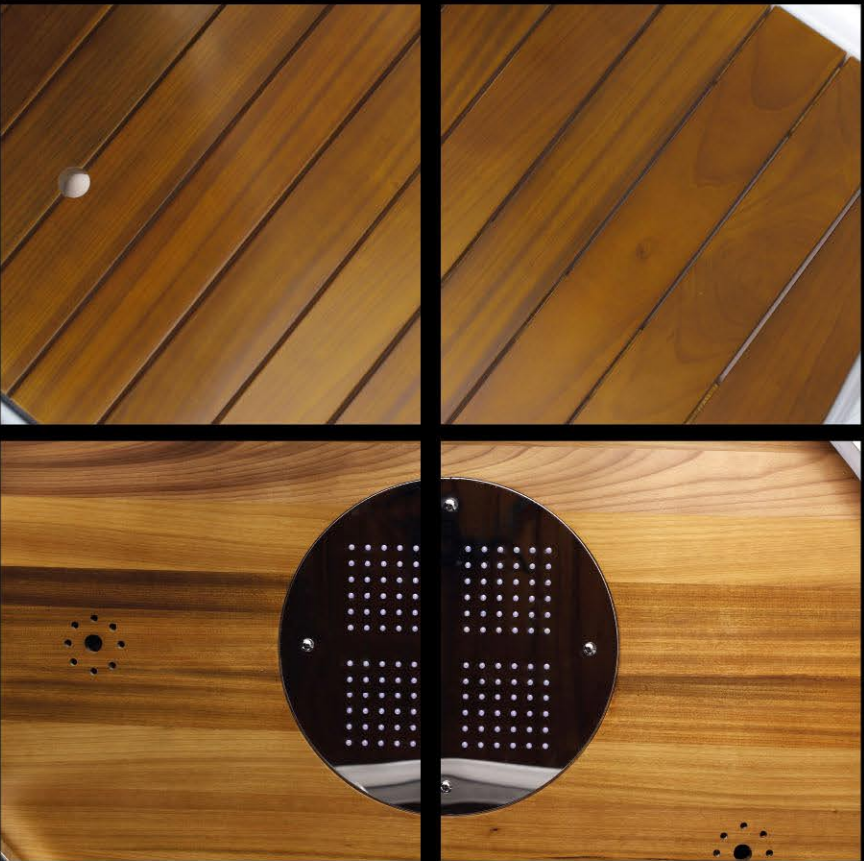

In addition to their superb health improvement functions, ATHENA series of built-in wellness shower cabins get outstanding among normal shower cabins by its elegant built-in style. Comparing to traditional shower cabins, there is no ugly gap between the cabin and the wall. Neither is there gap between the aluminum shower tray panel and the floor. Usually these gaps make cleaning work horrible and make the product look cheap. Through its seamless connection to wall and floor, ATHENA series of built-in wellness shower cabins become a natural part of the bathroom and are perfectly harmonious with the bathroom. All ATHENA series of built-in wellness shower cabins have the service access from inside.

The best wood for shower – TEAK

Teak is very precious wood worldwide. With high density and hardness, teak is most wearable, non-deforming, waterproof and anticorrosive. It's top material for high-end furniture. In Europe, teak is widely used on luxurious yachts. Famous Churches with the history of centuries often have teak wooden floors. Teak becomes beautiful natural golden color due to photosynthesis. The more nice-looking the longer time it exists. Because of its rarity, teak can only be afforded by supreme products.

The top version of ATHENA series of steam cabins makes use of teak roof, teak seat and teak floor, which guarantee the durability of the products. The natural golden color of teak creates a natural shower environment, satisfying our desire for nature and relieving us from stressing city life. Get completely relaxed at a home spa.

WS137/S6

EUPHROSYNE

wellness steam
shower cabin
and walk-in tub combination

EUPHROSYNE

wellness steam shower cabin and walk-in tub combination

SIZE: 1350x1350x2240mm (WS135-1S6/B6S)
1500x1500x2240mm (WS135S6/B6S)

Again GRANDEHOME has set up a new milestone in the industry worldwide by presenting walk-in steam cabin. The biggest disadvantage of traditional combination of steam cabin and whirlpool bathtub is inconveniences in stepping inside and outside. EUPHROSYNE has an easy entrance and exit and has solved that industrial problem completely. Now we can really enjoy the "all-in" beauty and health improvement functions of combinations of steam cabin and whirlpool tub, without any obstacles in getting in/out in daily shower life.

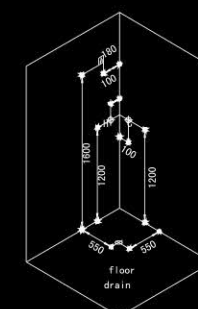

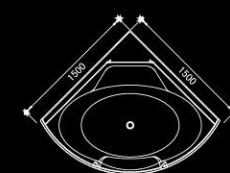

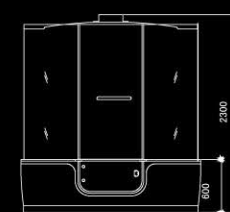

MAIN FEATURES

- Luxurious control system (S6), with luxurious wide touch screen control and wide LCD display;
- Vitamin E & C shower;
- 400x400mm large ceiling shower with 8 chromatherapy lamps around (400x400mm large LED ceiling shower with chromatherapy optional);
